- **Programming** Languages: C++, Java, JavaScript (React.JS, Node.JS)

- **Frameworks:** Express.JS

- **Database Management:** MySQL

- **Version Control:** Git, GitHub

- **SDLC Concepts:** OOP, File Handling

- **Fluent English speaking & writing**

EDUCATION

Bahria University *(2023 - Expected 2026)*
Degree: Bachelor of Science in Software Engineering
Current GPA: 2.9

COURSE PROJECTS

Product Management App (MERN Stack)

- Built a responsive MERN web app for managing products.
- Added features for adding, updating, & deleting products. Included light/dark theme toggle using React UI.

The Oasis – Food Ordering System (JavaFX)

- Built a food ordering app using JavaFX with responsive UI.
- Applied OOP concepts like abstraction and polymorphism.
- Used file handling for login, signup, and order tracking.

School Management System (Java, SQL)

- Developed a school system with modules for students, staff, attendance, and fees.
- Used Java and MySQL for CRUD operations and result generation.

Task Manager App (Java, File Handling)

- Created a Java-based task manager with file-based data storage.
- Enabled add, update, delete, and view task features.
- Handled exceptions to ensure smooth execution.
